# MBBS in GEORGIA

With an almost 0% crime rate and 100% literacy, Georgia is considered to be one of the best places for studying medicine in the world. Universities in Georgia have cultivated a reputation of being student-centric and furnishing quality education with a pro-cross-culture experience.

# About GEORGIA

---

Located at the crossroads between Western Asia and Eastern Europe, Georgia is a south Caucasian country bordering the Black Sea in the West. The country also shares borders with Armenia, Azerbaijan, Russia and Turkey. Its capital and largest city is Tbilisi.

- » **Capital** - Tbilisi
- » **Weather** - Temperate to Subtropical
- » **Currency** - Georgian Lari
- » **Official Language** - Georgian
- » **Other Spoken Languages** - Russian, English and Armenian

Georgia was absorbed into the Russian Empire in the 19th century. Independent for three years (1918-1921) following the Russian revolution, it was forcibly incorporated into the USSR until the Soviet Union dissolved in 1991.

Today, Georgia is one of the leading educational destinations in the world – with a very minimal crime rate, a developing economy and greater integration with Western institutions. Georgia is the 4th safest country in the world and has a population of 3.7 million inhabitants. The country is known to have one of the most unique and hospitable cultures in the world.

# About **TBILISI**

---

Georgia's capital, Tbilisi, is one of the best places where students can experience a good exposure to high-quality education. The city always welcomes people from different parts of the world to experience its beautiful nature, heart-soothing hospitality, delicious food and high-quality education.

The city's strategic location along east-west trade routes means that it has been coveted by numerous empires through the centuries. The literacy rate of Tbilisi is approx 100% which is why the crime rate is almost 0%. The cost of living is also very affordable in Tbilisi. Moreover, the population of the city is approximately 12,02,765.

#### Average Temperature in

**Summer:** 20 to 32 °C (68 to 90 °F)

Coaching Available

# Education SYSTEM IN GEORGIA

Georgia is known for continuing the global benchmark of education. By paying a much lesser amount of money as compared to Indian medical colleges, you get access to exceptional faculty, high-grade facilities and surety of valuable schooling due to their polished and outstanding teaching methodology.

## **The Bologna Process**

The Bologna Process is one of the best systems of education in Georgia. It is an agreement between European countries to constantly improve and maintain the high standards and quality of higher education.

In short, the Bologna process means that if a student obtains his degree in any city in Georgia, his/her degree will be equivalent to a degree from Germany, Lithuania or the United Kingdom. The best part about the Bologna process is that it is just like the undergraduates, postgraduates and doctorate system of India.

## **The European Credit Transfer and Accumulation System (ECTS)**

Another great education system in Georgia is the ECTS which is actually an element of the Bologna Process. The ECTS or the European Credit Transfer and Accumulation System aims to maintain the standards of education among university students. It is a credit system designed to make it easier for international students to move between different countries.

New

# VISION UNIVERSITY

The New Vision University is one of the most esteemed medical universities in Georgia that draws the attention of a large number of foreign students. With its exceptional teaching standards, NVU has become a training centre for medical and pharmaceutical specialists in Georgia and in foreign countries in the past decade.

Every year, a large number of foreign students, especially Indian, are admitted to the university and pass out to be competent Physicians. The university was founded with the aim of making society a much better place to live in. NVU strives to deliver the best possible efforts to bring out better and more responsible doctors.

Hospital**

# The Vision & MISSION OF NVU

The main goal of NVU is to become a distinguished institution with innovations tailored to public requirements. The University vigorously supports measures that bring closer professors, scientists, students, establishments and society of Georgia and various countries for mutually beneficial cooperation.

*The New Vision University aims to expand human vision through the promotion of education, research and innovation.*

*The University always inspires individuals to share knowledge, skills and values to contribute to the well-being of society.*

*Furthermore, the University is committed to promoting equal access to education for students from around the world.*

*NVU aspires to create an open, innovative and collaborative environment, ensure student engagement and serve society on a national and international scale.*

# Core Values OF NVU COMMUNITY

NVU offers a merge of regional and western educational scientific expertise to remain closely in touch with the labour market priorities nationally and internationally. The University aims to provide integrated and multidisciplinary educational programs with special emphasis on general skills modules, leadership and shared values.

# Courses OFFERED

The NVU opens a gateway for international students to pursue MBBS and spreads its wings of knowledge across global communities. The University believes in rendering an innovative and friendly environment to ensure the best education for students in various courses.

It is growing at a fast pace, becoming one of the best non-profit organisations in Georgia. It is also one of the highest centres for clinical research and education in the country. The family of NVU put in their best to train specialists, according to International standards, so that they can continue their studies in residency or doctorate programs.

NVU aims to offer an integrated and multi-disciplinary education that is mediated through research, education, and innovation. **The New Vision University School of Medicine offers** four-degree programs namely:

**Medical Doctor Program (MD)**

**Bachelor's program in Medical Rehabilitation and Nursing care**

**Master's Program in Medical Rehabilitation and Healthcare Management**

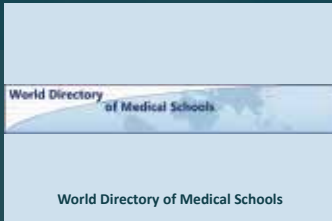

**Doctorate in Medicine**

# STATE-OF-THE-ART UNIVERSITY FOR MEDICAL EDUCATION IN GEORGIA

Affiliated and recognized by:

# About THE FOUNDER

David T Kereselidze is an Educationist, Philanthropist and a Game Changer in the world of Medical Studies in Georgia. He has contributed significantly to society and has touched many lives with his vision to spread education.

***“Leaders don’t do different things; they do things differently”***

And Mr. David has proved the above written saying is true by his long lists of achievements in the fields of education, economy, law, foreign affairs & trades.

His Vision formed through years of smart work and academic knowledge developed over time. This gave him the inspiration to influence the education sector at an international level turning him into a big asset for Georgia.

#### **Academic Milestones:**

David Kereselidze holds a law degree from Tbilisi State University in Georgia. He had pursued LL.M and Doctor Juris degree from the University of Saarland in Germany. His fluency in English, Georgian & Russian adds another multilingual feather to his cap. He is a role model for many young talents because of his curiosity to discover new things, passion, hard work & dedication, compassion, humbleness and modesty. He is a self-motivated person and his personality with dignity attracts others to be a part of his vision to make this world a better place to live.

#### **Inspirational Career Journey**

Some of the most recent and eminent positions held by Mr. Kereselidze are:

- » Professor of Private Law at the Tbilisi State University
- » Chief Editor at Georgian Law Review since 2002
- » Deputy Director at Georgian-European Policy and Legal Advice Centre (GEPLAC)
- » Dean at Tbilisi State University Law School
- » Director at National Centre for Educational Accreditation (NCEA)
- » Director at National Centre for Educational Quality Enhancement (NCEQE)

His input in the reform of Georgian higher education and the development of the science of law, Mr. Kereselidze was awarded a doctorate degree by the University of Georgia in 2010. At present, he is offering his services as the Head of the Academic Board of New Vision University, Tbilisi, Georgia.

# Statistics OF NVU

The New Vision University is located in the capital of Georgia, Tbilisi. Students can easily take flights from India to reach the university. It will take almost 12 hours from IGI Airport to Tbilisi International Airport, Georgia.

NVU welcomes students from all over the world to experience a great method of knowledge and clinical exposure.

INDIAN MEDICAL STUDENTS

NVU is the only university in Georgia that executes its MD program in its own hospital. This is a standard established by TUNING/MEDICINE that will become a mandatory requirement for all European universities offering an MD degree

# Curriculum MBBS PROGRAM

The Medical Doctor educational program (360 ECTS) aims to develop caring, competent, confident medical doctors through an outcome-based teaching approach ensuring high quality of healthcare and biomedical research in academic, in- and out-patient settings.

The MD curriculum consists of four loops referring to knowledge, skills and values, where every consecutive loop builds on the previous one and sets more complex learning objectives.

- » **The Curriculum Spiral's First Loop (120 ECTS)** is comprised of the widely integrated core modules of Body Systems (Anatomy, Physiology, Imaging) and Life Sciences (Biochemistry, Molecular Biology, Histology), which are vertically linked to summative pathology course and accompanied by teaching core values of medicine, clinical skills and research methods.
- » **The Curriculum Spiral's Second Loop (60 ECTS)** containing bridging courses (Bridging PBL, Pharmacology and Systemic Pathology) and synergy courses (Physical Diagnosis, Family Medicine I, General Surgery, etc) links the study of pathological changes and disease symptoms with the practical comprehension of modern principles and methods facilitating the diagnostic process.
- » **The Curriculum Spiral's Third Loop (120 ECTS)** is bound to the study of the treatment of diseases and syndromes in accordance with the latest clinical guidelines and protocols constructed by evidence-based medicine. It builds on the previous loop by revisiting and deepening knowledge, mastering skills and developing values simultaneously setting higher-level complex objectives.
- » **The Curriculum Spiral's Fourth Loop (60 ECTS)** builds on and rounds up previously acquired competencies reinforcing trans-disciplinary understanding of real-world challenges. Thus, the final and highest level of learning objectives are met through hands-on practice by applying gained knowledge, skills and values independent of discipline-specific understanding.

# INFRASTRUCTURE

The New Vision University believes in imparting a more valuable college experience through technological advancement and modern infrastructure. From classrooms to laboratories, the university campus is equipped with advanced technologies for a better learning experience for the students.

NVU offers high-quality medical education through extensive Wi-Fi support for its students, ebooks and other forms of electronic learning material, better machines, and diagnostic equipment. Recently, the university has purchased new equipment where they can stimulate human beings while training the students.

# LIBRARY

The library houses a collection of books for seminars, ABC Library, library service centre, university electronic resources and literature research international system. The **Seminar library** is open **every day** from 9:00 until 21:00, and until 24:00 in the case of a preliminary request.

Some books and manuscripts dating back as far as 1800 have been donated from private collections. According to the agreement between New Vision University and the "**Civic Education and Social Equality Centre**," these books will be hosted by the NVU library permanently.

# CLASSROOMS

New Vision University has an exceptionally comfortable learning environment in all of its classrooms and lecture halls. The halls are facilitated with unique designs, multiple technologies, comfortable seats and a lot more. Instead of sitting passively through lectures, the students easily interact with their class fellows and professors.

- » The halls have wireless technology, audible setting, and visual classes.
- » The assignments and quizzes are regularly held in the classrooms via the laptops of the students.
- » The chairs are not only comfortable but can also easily swivel, so that engagement and group discussions are even easier.
- » The large screen behind the teacher helps in classroom discussions and teaching to all the students without fail.

This also allows the instructors to simultaneously feed several different high-resolution images into the mind of the students. At NVU, learning is not limited to theoretical cramming - but to practical, easy and effective learning. Experiments are conducted under a fume hood present in each classroom so that the activities are broadcasted to all the students at once through a large screen.

# HOSPITALS

The medical work of the staff of clinical departments of the university is aimed at providing a practical component of the educational process for training doctors, improving the quality of medical care, further developing and availability of all types of medical care, stimulating effective cooperation between health care institutions and university on medical, scientific and educational activities, without which it is impossible to train and retrain highly qualified specialists in the health care.

The leading aspects of the NVU hospital are the following:

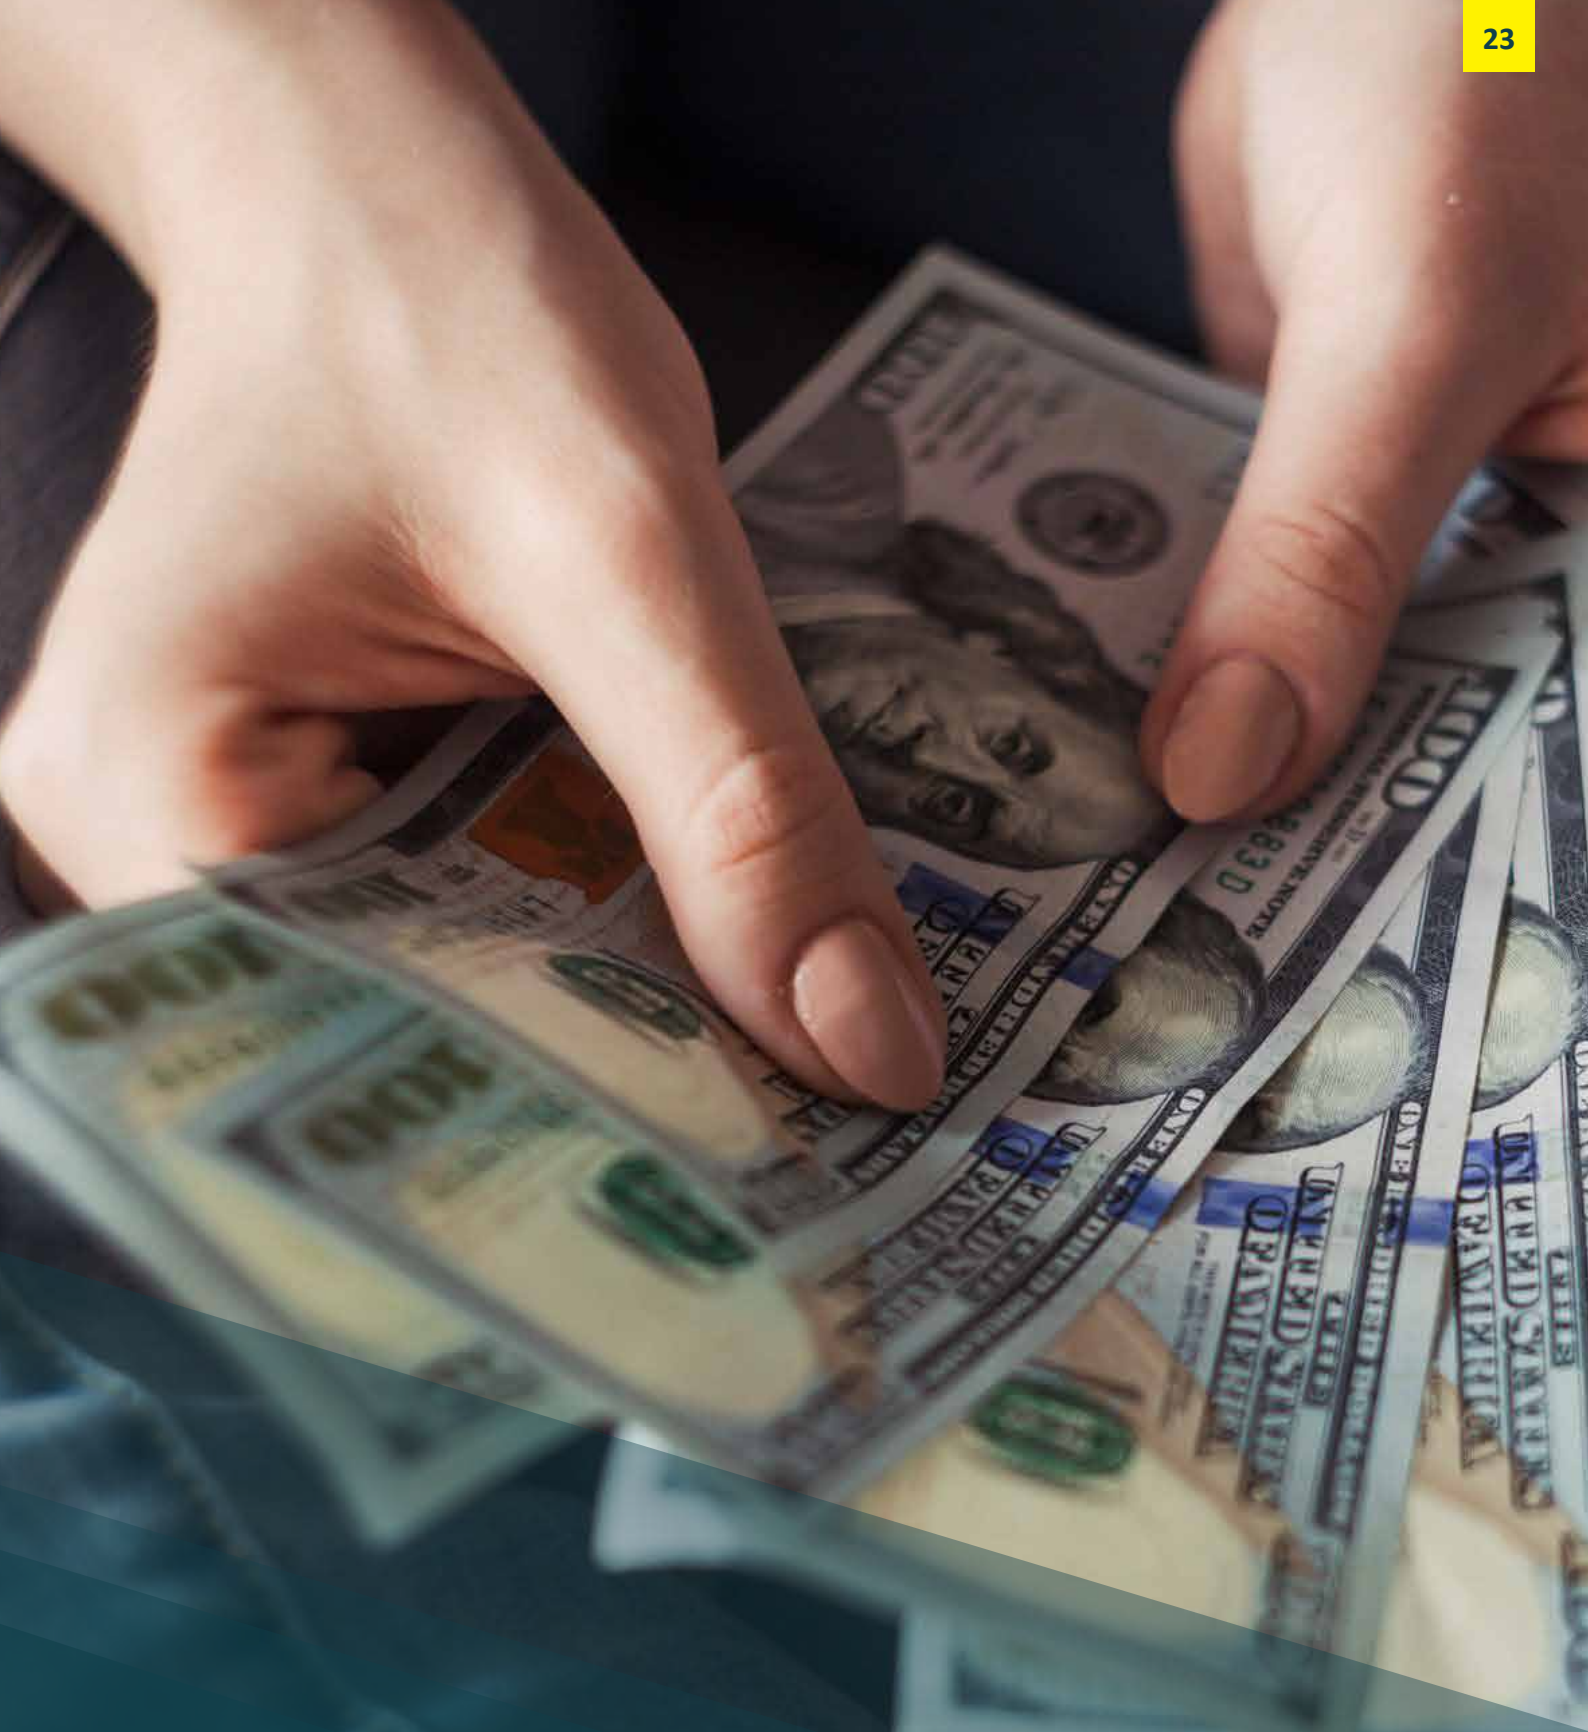

- » Providing specialised medical care
- » Conducting researches
- » Ensuring the educational process of students, masters, clinical residents and postgraduate students of the university
- » Advanced training of medical workers

# INTERNATIONAL TIE-UPS & PG OPTIONS

Internationalisation is one of the key priorities of the University and is regarded as an essential instrument for the promotion of education. NVU vigorously supports measures that bring closer professors, scientists, students, establishments and society in general of Georgia and various countries for mutually beneficial cooperation.

With a diverse study environment with over a thousand international students, NVU has cooperation with top countries such as the USA, UK, etc. Hence, a medical degree from NVU will make you eligible to pursue your PG studies in any part of the world.

# TUITION FEES

The New Vision University has one of the most affordable tuition fees among many top-ranked Georgian medical universities. The tuition fee for this prestigious university is **7,000 USD per year** - and the total fees sum up to be 35,000 USD for the entire degree course. Moreover, the university offers a **25% scholarship** on the tuition fees from the second year making it feasible for international students and deserving candidates.

# HOSTEL & AMENITIES

New Vision University has 3 hostel blocks with superior facilities for both boys and girls. With a ragging-free environment, the rooms are shareable and fully furnished. The university mess offers delicious Indian food to the students. The kitchens are well cleaned and sanitised. The university administration makes sure about sports facilities and other amenities for students.

**The kind of amenities offered at NVU include:**

Bed & wardrobe >> Banking facilities >> Medical centre >> Sports facility >> Internet >> Gym >> CCTV  
Security guards

# MESS

Studying abroad becomes slightly easier when you get the type of food you are used to eating. At NVU, there is a large number of Indian students due to which there is an Indian mess within the hostel campus. Indian students can easily find North as well as South Indian cuisine cooked by expert Indian cooks.
